

# The 2022-23 UK CX Decision-Makers' Guide

ContactBabel's annual **US & UK Contact Centre Decision-Makers' Guides** have become the benchmark for up-to-date and insightful coverage of the contact centre industry over the past 15 years.

In 2018, we launched the annual **US & UK Customer Experience Decision-Makers' Guides**, which extended our research and analysis into the wider customer experience space as well.

#### RESEARCH COVERAGE

The Customer Experience Decision-Makers' Guides are based on extensive surveys of over 200 UK organisations' CX strategies, practices, technologies and plans.

Additionally, a survey of 1,000 UK consumers is carried out in order to judge whether organisations' CX focus and investments are being put into the areas which consumers actually value most. The analysis and results coming from this direct comparison will attract significant extra PR and interest for the **UK CX Decision-Makers' Guide**, increasing its readership and benefiting sponsors.

The report will contain data and analysis on the following areas:

- Use of CX supporting technology
- The role of analytics and video
- CX budgets and ROI (split by investment type and channel)
- CX ownership & governance
- The focus of CX improvement programmes
- The most important CX factors, as judged by organisations and consumers

- The role of automation in CX
- Future CX investments
- Omnichannel and the customer experience
- The success and failure of CX programs
- CX measurement methods
- CX benchmark scores and usefulness
- How employees are rewarded for CX
- The effect of the coronavirus crisis on CX
